

Que: Write a shell script to input a string from the user and determine its length.

The screenshot shows a VS Code terminal window with the following content:

```
#!/bin/bash

echo "Enter the first string:"
read string1

echo "Enter the second string:"
read string2

if [ "$string1" = "$string2" ]; then
    echo "The strings are the same."
else
    echo "The strings are not the same."
fi

length1=${#string1}
length2=${#string2}

echo "The length of the first string is $length1"
echo "The length of the second string is $length2"
```

```
~/avg/String_sameOrnot$ ./addShellscript.sh
Enter the first string:
Faal
Enter the second string:
faal
The strings are not the same.
The length of the first string is 4
The length of the second string is 4
~/avg/String_sameOrnot$ vi addShellscript.sh
~$ cd avg
~/avg$
```
